

Big Analysis of Muons 2021

19 May 2021

Dear Colleagues,

Thank you for your registration and coming participation in the Big Analysis of Muons (BAM). Registration is now closed and it is time for us to look at the next steps.

Let's start with these:

- [Big Analysis of Muons 2021](#) is the home page for teachers. This has information you can use and a timeline to help you schedule.
- The student homes are the [ATLAS](#) and [CMS](#) pages. These have the information they need to do the measurements, including instructional videos.
- Students should watch the videos for their measurement before attempting the measurement. This is our main vehicle of instruction.
- Teachers are important coaches and organizers for the students. Please watch the same videos before the students do!
- We will have teacher Q&A sessions on Zoom this Friday 21 May, at 11:00 UTC for CMS and 20:00 UTC for ATLAS. I will send you the Zoom link and password shortly before the meeting to maximize security.
- Warning: our servers will be down for maintenance this Friday 12:30-19:00 UTC (right between our Q&A meetings).
- Check the [Timeline](#) for more events!

You will notice that all times given for BAM are in UTC, *not local times*. You can convert to your local time using this [Time Zone Converter](#). Please do so!

Finally, data assignments will be ready later today or very early tomorrow. These will be made by institution. It is up to the teacher/professor/leader at the institution to then assign data files to individuals. Thus you will be hearing from me again soon!

I'll be sending frequent emails this week and beyond to offer help and respond to queries. These will be posted under [Resources](#) on the BAM 2021 page. Please send your questions and comments!

Thank you and, again, welcome,

Ken
